is about 400,000,000 tons.

If Autocracy should win in this titanic struggle for human rights, all our accomplishments of the past would be swept away and tyranny and oppression would be rampant throughout the world. Should that come true, no class would suffer as much as the men and women of labor, and it will come true if we fail to support our Government in the present crisis.

A government can be no stronger than the people living under it make it, and if we fail to respond to our Government's appeal for help our war policy must collapse and our countrymen "over there" must fall, and in that event it is inevitable that the forces of autocracy shall be triumphant over the forces of democracy. Thus it is that every working man and working woman in America should buy Liberty Bonds.

Money invested in Liberty Bonds is as safe as our Government itself. The Illinois district of the United Mine Workers of America has purchased \$506,000 worth of the first, second and third issues of bonds out of district funds and we propose to buy \$500,000 worth of the fourth issue. Our various local unions have made purchases aggregating millions and I am certain they will buy bountifully of the fourth issue. The rate of interest paid on such investment is fair. However, the paramount reason why we should buy Liberty Bonds is because the fate of the world is in the balance, the freemilitary despotism? That is the great dom and happiness of humanity is at is one of the mediums through which our Government must raise the money to feed and equip and to care for our sons and brothers, our relatives and associates, our countrymen-"the boys over there"-while they fight to crush autocracy and to implant in its stead liberty and justice for all the peoples of all the nations of the world.

Thomas Paine on Monarchy. When we survey the wretched condiion of man under the monarchial and hereditary systems of government, tragged from his home by one power or driven by another and impoverished by taxes more than by enemies, it beomes evident that those systems are bad, and that a general revolution in the principle and construction of government is necessary.—Thomas Paine.

Morale in German Army Decilning. A captured secret order of Gen. Von Ludendorff indicates that the morale of the Germans is giving way under the pounding of the Allies. The order states that "men on leave have spoken publicly of a revolution that is to break after the war." The German general wants all men on leave to be searched to see that they do not carry with them arms with which to carry into execution their threats. A prompt subscription of the Fourth Liberty Loan will help to bring the -er to a speedy end.
